## **DETAILED ACTION**

1. Amendment filed on 10/6/05 has been received.

## Claim Rejections - 35 USC § 103

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. Claims 1, 3-5, 7 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Berends (U. S. Patent no. 6,209,857) in view of Collier (U. S. Patent no. 6,406,221).

Berends discloses: impact absorption member 2 with cross section and end walls (see figure 3), flange with side walls 10 and center wall between facing the bracket, bracket with back wall 4 and side arms 8, mounting member 7

Berends does not disclose a cylindrical shape. Collier teaches a cylindrical shape. It would have been obvious to one of ordinary skill in the art at the time the invention was made to use a cylindrical shape as the vessel would encounter the same impact surface from any angle. This allows for the force to be absorbed in a consistent manner even if the vessel impacts from an odd angle.

Regarding claim 5, Berends does not disclose the use of polyurethane. Collier teaches the use of polyurethane (see figure 6 column 5 line 5-26) It would have been obvious to one of ordinary skill in the art at the time the invention was made to use polyurethane as

Art Unit: 3683

taught by Collier in the device of Berends as material selection is merely a design choice. Collier discusses the advantages of Polyurethane in the cited section.

Regarding claim 3, Berends does not disclose the use of lobes. The use of lobes is well known. It would have been obvious to one of ordinary skill in the art at the time the invention was made to use lobes on the device of Berends as such is merely a design choice.

4. Claims 2 and 8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

## Response to Arguments

- 5. Applicant's arguments with respect to claims 1, 3-5,7,9 have been considered but are most in view of the new ground(s) of rejection.
- 6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert A. Siconolfi whose telephone number is 571-272-7124. The examiner can normally be reached on M-F 10 am-3 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James McClellan can be reached on 571 272-6786. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
